

Statement of Commitment: Workplace Safety and Health

A strong, proactive workplace safety and health culture is a top priority for Red River College. The College is responsible for and committed to providing all employees, workers, students and visitors with a safe and healthy environment, and will require all to use appropriate safety and health practices in the exercise of their duties.

The President will establish and enforce policies and procedures necessary to address institutional safety and ensure compliance with Manitoba's Workplace Safety and Health Act is achieved – and exceeded wherever possible.

Safety First at Red River College means setting an exceptional standard as an education leader in workplace safety and health. It is the College's responsibility to instill a keen awareness of safety standards in our students, preparing them to be safety champions in their future workplaces.

Paul Vogt

President and CEO
Red River College
